

# REEF RELIEF

Match the description to the species name, then color it in!

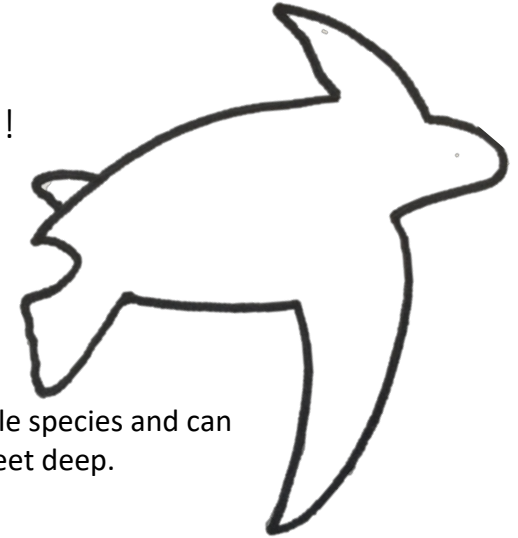

I am only found in Australia.

---

I am the largest sea turtle species and can dive to 3,000 feet deep.

---

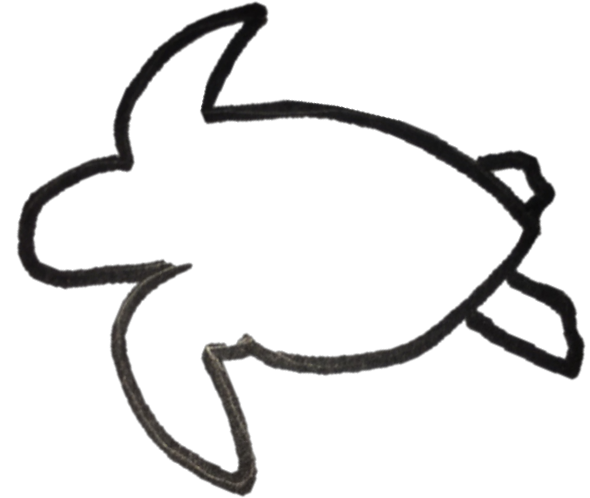

I eat so much sea grass, my inside fat turns green

---

I am named this because of my bird-like beak.

---

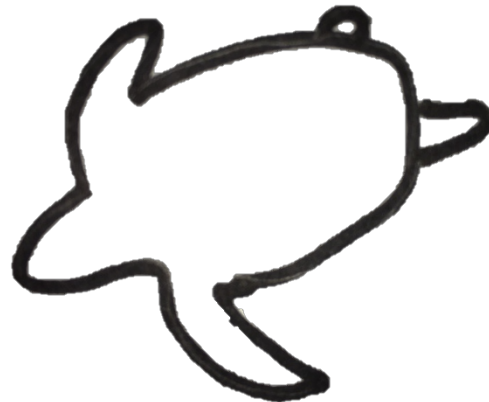

I have a very large head; my jaws can crush hard things.

---

I am often called the "ghost turtle".

---

Once a year I nest in a large group called an arribada.

---
